

Session 3
Bringing It All Together with Positive Results

Tuesday, June 4th, 6:30-9 pm

Session #3 Introduction

Tuesday, June 4th, 6:30 pm

Lake Management Plans

Tuesday, June 4th, 6:35 pm

A good lake plan resembles a health plan rather than a bandage. To be effective, the plan should address both preventive and remedial options. Once drafted, approved and implemented, revisit the plan regularly as lake/river conditions and people's expectations change. In this session Alex will cover the typical planning and implementation grant outline, necessary government and public reviews, and requirements for plan approval by DNR.

Presenter: Alex Smith, Water Resources Management Specialist, Wisconsin DNR

Plan and Project Implementation

Tuesday, June 4th, 7:05 pm

Patrick Goggin will present examples of lake management implementation efforts from various lake communities around the state. He will present these implementation ideas by lake management theme, sharing experiences and lessons learned along the way. Cases will illustrate common steps encountered in the implementation process. Some barriers to achieving implementation success will also be discussed.

Presenter: Patrick Goggin, Lake Specialist, UW-Extension Lakes

Working with Government and Consultants

Tuesday, June 4th, 7:35 pm

The lake/river organization usually has ultimate responsibility for assuring management success and long-term continuity! Polk County lake/river organizations do not have professional staff and organizations must therefore utilize government staff, consultants and scientific services for hire, assure cost effectiveness and meet management goals. Here's how to know your resources and seek true partnership commitments.

Presenter: Karen Engelbretson, President, Polk County Association of Lakes and Rivers

Break

7:50-8:00 pm

Q & A with Water Resources Professionals

Tuesday, June 4th, 8:00 pm

Attendees will be asked to accumulate unanswered questions during the sessions and submit them for discussion during this time. These questions will be grouped if necessary so that all questions can be covered. If time permits, spontaneous questions and answers will be entertained.

Responders:

Matthew Berg, Endangered Resource Services, Regional Consultant

John Haack, Natural Resource Educator, St. Croix River Basin, UW Cooperative Extension

Katelin Holm, Information and Education Coordinator/Water Quality Specialist, Polk County Land and Water Resources Dept.

Patrick Goggin, Lake Specialist, UW-Extension Lakes

Steve Schieffer, Ecological Integrity Service, Regional Consultant

Alex Smith, Water Resources Management Specialist, Wisconsin DNR

Jeremy Williamson, Watershed Biologist, Polk County Land and Water Resources Department

Closing Remarks

Tuesday, June 4th, 8:45 pm
